FullStack developer / DevOps

Metrological is quickly growing (inter-)nationally and therefore we are looking for expansion of our current team with a FullStack developer / DevOps.

Responsibilities
You will become a part of the development team (consisting of 40 team members, including App Developers, Testers, Graphic Designers and Backend / Framework Developers) and are responsible for the development and maintenance of all backend services for our TV Appstore and associated TV Applications.

The Appstore is continuously under development as we are glad to supply innovative products to our customers. In addition to innovation, the challenge lies mainly in the code-technical aspect and the maintenance of the cloud architecture. There is an extensive cloud architecture with> 99.99% uptime that serves more than 100TB of data per month worldwide and has to handle 2500 requests per second at peak times.

The daily activities range from data modeling to implementation, from web sockets to server architecture and the resolution of possible production problems.
As a FullStack developer / Dev Ops you work with different techniques, such as NodeJS, Linux, Nginx, Redis, ElasticSearch, MySQL and AngularJS.

Whether you want to be primarily active in developing the back-end services or look for alternation in other innovative projects that we work on, depends on your own wishes, competencies and ambitions.

Qualifications
- Bachelor's or master's degree in computer science or similar technical area is a must;
- Relevant experience as a full stack developer / dev op is a must;
- Extensive experience with Javascript, Linux en MySQL is a must;
- Experience with NodeJS, Redis, nginx en ElasticSearch is a plus;
- You have an excellent command of the English language, in word and in writing;
- Furthermore, you are accurate, structured and a team player, who is able to work independently and take on responsibilities.

We offer
The salary depends on knowledge and experience. Metrological is growing fast so the internal (growth) possibilities are virtually unlimited.

We offer you a position in which you can relinquish your creativity and work on the product of the future. You work in an inspiring environment with the latest equipment, so you can get the best out of yourself.

Apply?
Do you want to contribute to the success of Metrological? Send your resume and a short introduction of motivation to Marlous de Leeuw via recruitment@metrological.com.

Metrological is a very innovative and dynamic company in the TV industry.
The office is located in the heart of Rotterdam and can best be described as a modern and inspiring work environment with an informal but professional atmosphere.

With a close-knit team of over 60 young and ambitious employees, the company works daily on the (continued) development of the Appstore for TV operators.

Metrological is growing (inter) nationally and looking for expansion of our current team.
